

## Product Change Notification

Notification number: PCN2024002

Notification date: 2024-05-01

Implementation date: 2024-05-01

Dear valued customer,

This letter is to inform you of an upcoming change regarding one or several of our products.

**Product(s) involved:** All products in our IDseek® portfolio: IDS-ASTR96, IDS-YSTR96, IDS-MPH96, IDS-SNP96, IDS-HVR96, IDS-MTC96

**Change description:** The IDseek Kits will include an additional tube (ELB-002), containing Elution Buffer (2 tubes for products with a double panel).

**Reason:** Improvements related to customer feedback.

**Additional information:** The Elution Buffer will be provided in a separate bag in the box and is enough to perform up to 12 - 13 purifications. The bag will come with instructions that it is to be used for post amplification processing. Please refer to the latest version of the IFU for instructions on how to use the Elution Buffer. The latest version of the IFU is available from the download section on the NimaGen website:  
<https://www.nimagen.com/downloads>

Following the implementation date, we will first exhaust any existing stores of pre-change products.

We apologize for any inconvenience this change may cause to your workflow. If you require any further information regarding this change, please do not hesitate to contact us at [info@nimagen.com](mailto:info@nimagen.com) or via your NimaGen representative.

Sincerely,

The NimaGen team
