

Notice of 2024 Price Change

Nijmegen (The Netherlands), November 17, 2023

Dear customer,

NimaGen is committed to offering you the quality and pricing you expect and deserve.

In order to maintain the service levels, product quality and to continue meeting the strong market demand for our products, we have reviewed the list prices for NimaGen products effective 1 January 2024.

On average, product list prices will increase by 3.5%.

NimaGen have strived to keep price increases to a minimum, to limit the impact on your research and operations. Continued volatility in the cost of energy and logistics, as well as ongoing inflation have made these increases unavoidable.

Please contact your NimaGen representative to discuss how this price increase may effect your running agreement(s).

As always, we value your continued use of NimaGen products and our relationship with you and look forward to further servicing your Sanger Sequencing & Fragment Analysis, Next-generation Sequencing and Nucleic Acid Extraction and Clean-up needs throughout 2024.

With kind regards,

Rogier van Otterlo
Commercial Director (CCO)
